

FAINI PORTFOLIO IMPROVES WITH 1.0M DIAMETER DUAL BAND ANTENNAS

We proudly announce that the new **1.0 m diameter antenna** is now available, beside the 0.6m existing one, within **Dual Band antennas (EBand+MW)** family.

The tests session on our **1.0 m Dual Band Dual Pol** antenna in the **(80+18)GHz** frequency bands, have been successfully concluded at the Munich University Lab.

The new range of 1.0 m diameter antennas, both in Dual Bands and Single Bands versions as well, will be soon available for the market.

Do not hesitate to contact us for further technical and commercial information at info@fainitelecommunication.com
